Professional Profile

Full-Stack Web Developer with a Doctorate in Engineering (UPM) and deep expertise in Technical SEO, Performance Optimization, and Content Strategy. I design, build, and launch my own products end to end: CotizaT, a construction-estimating SaaS with its first paying companies; four live marketplaces on one reusable engine; and a custom ERP for a vehicle-import business. I combine solid engineering skills (Next.js, TypeScript, Python, Supabase, Stripe) with proven SEO execution—achieving first-page rankings, 99/100 PageSpeed scores, and 40%+ organic traffic growth. Dual residency in Caracas and Madrid, available for remote work.

Founder & Full-Stack Product Developer

Own Software Products - SaaS, Marketplaces & ERP

2026 - Present

- Designed, built, and launched a construction-estimating SaaS (CotizaT), three new marketplaces, and a custom ERP, covering product, database, payments, SEO, testing, and deployment end to end.
- CotizaT: multi-tenant Python/FastAPI application on PostgreSQL (Supabase) with Row Level Security, Stripe subscriptions, and 23 countries configured—98,000 lines of Python, 378 routes, and 2,600+ automated tests.
- Reusable marketplace engine in Next.js, TypeScript, and Supabase: CamperOcasión, with dealer storefronts and Stripe subscriptions, and MaquinariaOcasión, a new B2B vertical launched in four days.
- Payments adapted to each market: Stripe subscriptions end to end in Spain; Pago Móvil and Binance receipts read by OCR and validated in Venezuela Inmuebles.
- Programmatic SEO across products: landing pages by country, province, city, and category with structured data, hreflang, sitemaps, and IndexNow.
